

The New Brunswick Routine Immunization Schedule is set by the Chief Medical Officer of Health. Vaccines recommended in the Routine Immunization Schedule are provided by Public Health and other health-care providers throughout New Brunswick. "On time" and "on schedule" immunization provide the best protection against vaccine preventable diseases.

| Routine Childhood Immunization Schedu | ule                                                                      |  |
