Varicella [¶] (chickenpox) HealthLinkBC File # 44b				√		
DTaP-IPV-Hib (diphtheria, tetanus, pertussis, polio, Haemophilus influenzae type b) HealthLinkBC File # 15b					√	
DTaP-IPV (diphtheria, tetanus, pertussis, polio) HealthLinkBC File # 15d						✓
MMRV [¶] (measles, mumps, rubella, varicella) HealthLinBC File # 14e						✓
Influenza HealthLinkBC File # 12d and 12e			★ (6 months-4 years)			
Hepatitis A * HealthLinkBC File # 33			1	(0.1	✓ V	✓ □

- Children with specific medical conditions that place them at high risk of disease should receive an additional dose at 6 months of age. See HealthLinkBC File # 62a for more information or speak to your health care provider.
- ¶ Children who had chickenpox or shingles disease, diagnosed by a health care provider, at 1 year of age or older do not need the chickenpox vaccine. Children entering school who need both a 2nd dose of MMR and varicella vaccines may be immunized with MMRV vaccine.
- A second dose is needed 4 weeks after the first dose if receiving vaccine for the first time.
- ♦ Hepatitis A vaccine is offered to Aboriginal children living both on-reserve and off-reserve.
- Hepatitis A vaccine is offered to Aboriginal children starting at 6 months of age. Alternatively, 1 or 2 doses will be offered to kindergarten-age children starting at 4 years of age depending on previous immunization history.
