

Waxing Treatment Preparation & Consent Form

Name _____ Date of Birth _____

Address _____ City _____ State _____ Zip _____

Home Phone _____ Mobile Phone _____ Email _____

How did you hear about us? _____ What area are we waxing today? _____

Pre Treatment Care: Please read prep to determine if you are a candidate for waxing by answering NO to any of the below contraindications you currently are using or under medical care for.

Accutane Yes No Retin-A Yes No Alpha-hydroxy Acid Yes No

Glycolic Acid Peel Yes No Resorcinol Yes No Are you diabetic? Yes No

Cancer Therapy? Yes No Skin Allergies Yes No Hyperpigmentation Yes No

Have you used or currently using other skin thinning medications? If so, which?

Any other illness/condition you are presently being treated for by a medical professional?

Note: Hair must be ¼ to ½ " long for successful waxing

*New use of any of the medications listed above increases the possibility of a reaction, check with your doctor before discontinuing any medication or for contraindications. Please inform the esthetician if you have begun taking any new medications since your last session.

*Please note waxing does have certain side effects such as skin removal, redness, scabbing, bruising, scarring, swelling, tenderness, hyperpigmentation, and/or pimples.

*Waxing of soft tissue may cause the skin to tear. The most common occurrence of this is in a Brazilian bikini wax.

When is your menstrual cycle's start date? _____ Because of water retention and for your personal comfort, avoid hair removal two days before your cycle starts and two days after.

Post Treatment Care: It is important to care for the waxed area properly after treatment to prevent ingrown hairs, breakouts, or other reactions. The following steps will give you the best results:

-Use a gentle exfoliator on recently waxed skin to help keep the skin clear and less prone to blemishes. Check with your Esthetician before use.

-Avoid swimming and heavy exercise to keep skin clear of ingrown hairs and blemishes.

-For breakout zones, defined as the face, back, and chest, use an anti-bacterial cleanser and lotion. Check with your Esthetician for proper post-care products.

-Steer clear of direct sunlight and tanning directly after waxing, especially while the skin is still red from treatment.

-Don't use products with harsh chemicals, perfumes, or dyes.

I have read the above information and if I had any concerns, I have addressed them with my Esthetician. I give permission to my therapist to perform the waxing procedure we have discussed and will hold he/she and Spa Therapy harmless from any liability that may result from this treatment. I have given an accurate account of the questions asked above including all known allergies or prescription drugs or products I am currently ingesting or using topically. I understand my esthetician will take every precaution to minimize or eliminate negative reactions.

I understand the pre and post-treatment. I am willing to follow the recommendations made by my esthetician for a home care regimen that can minimize or eliminate possible negative reactions. In the event that I have additional questions or concerns, I will consult with my esthetician immediately.
